THE INSTITUTION OF METALLURGISTS

Contents

		Page
MS 103	**Superplasticity in the Aluminium–Zinc Eutectoid.** By A. Ball and M. M. Hutchison	1
MS 104	**Tensile Deformation at High Temperatures of Unidirectionally Grown and Polycrystalline Aluminium–$CuAl_2$ Eutectic.** By B. R. Butcher, G. C. Weatherly, and H. R. Pettit	7
MS 105	**On the Solubility of Boron in High-Purity Alpha-Iron.** By A. Lucci, G. Della Gatta, and G. Venturello	14
MS 106	**Dislocation Density and Dislocation Arrangement during Creep of 20% Cr–35% Ni Stainless Steels.** By R. Lagneborg	18
MS 107	**The Solvus Curve for Guinier–Preston Zones in Al–Zn Alloys: A Diffuse X-Ray Study.** By T. Niklewski, P. Spiegelberg, and K. Sunbulli	23
MS 108	**Creep of Dispersion-Strengthened Nickel–Chromium Alloys.** By B. A. Wilcox and A. H. Clauer	26
MS 109	**The Mechanism of Void Growth and Factors Affecting the Onset of Intergranular Failure during Creep of a Mg–0·8% Al Alloy.** By H. E. Evans	33
———	**Discussion: Bubble Growth in Materials Supersaturated with Inert Gas**	39
MS 110	**Structural Changes during Superplastic Deformation of the Al–Cu Eutectic Alloy.** By M. J. Stowell, J. L. Robertson, and B. M. Watts	41
MS 111	**Fracture Characteristics of a Brittle-Matrix/Ductile-Fibre Composite.** By Stephen D. Antolovich	45
MS 112	**Strain-Induced Cavity Development during Creep.** By P. W. Davies and K. R. Williams	48
MS 113	**A Parametric Approach to Creep Damage.** By D. A. Woodford	50
MS 114	**The Mechanism of Formation of a Periodic Eutectoid Structure at Low Temperatures in Plain Chromium Steel.** By Markku Mannerkoski	54
MS 115	**Mechanisms of Creep and Recovery in Nimonic 80A.** By D. Sidey and B. Wilshire	56
MS 116	**Vacancy Recovery in Quenched Aluminium–Indium Alloys.** By F. C. Duckworth, T. R. Ramachandran, and J. Burke	61
MS 117	**The Activation Energy of Void Growth from Fracture Measurements during Creep.** By R. P. Skelton	67
MS 118	**Interdiffusion in the Nickel–Tungsten and Thoria-Dispersed Nickel–Tungsten Systems.** By J. M. Walsh and M. J. Donachie, Jr.	68
MS 119	**On the Formation of Internal Fatigue Damage in Association with Twins in α-Titanium.** By C. J. Beevers and M. D. Halliday	74
MS 120	**Dissociated Dislocations in Iron Observed by Field-Ion Microscopy.** By D. A. Smith and J. Gallot	79
MS 121	**Structural Aspects of Fatigue in Beryllium Single Crystals.** By J. F. Breedis and A. Lawley	81
MS 122	**On Recrystallization during Elevated-Temperature Deformation of Bicrystals of Zinc.** By M. D. Halliday, N. B. W. Thompson, and C. J. Beevers	88
MS 123	**Volume and Grain-Boundary Diffusion in 20 Cr/25 Ni/Nb Stainless Steel.** By A. F. Smith and G. B. Gibbs.	93
MS 124	**On the Kinetics of Precipitate Dissolution.** By M. J. Whelan	95
MS 125	**On the High-Temperature Relaxation Peak in F. C. C. Metals.** By J. T. A. Roberts and P. Barrand	97
MS 126	**Electron Fractography of Weld-Reheat Cracking in CrMoV Steel.** By T. Boniszewski and N. F. Eaton	103
MS 127	**Mechanisms of Cleavage-Fracture Initiation in Notched and Smooth Specimens of 3% Silicon Iron.** By G. Oates and J. R. Griffiths	111
MS 128	**Physicochemical Factors in the Dissolution of Thoria in Solid Nickel.** By C. B. Alcock and P. B. Brown.	116
———	**A Correction to Two Recent Papers on the Creep of Alloy Steels.** By R. K. Ham	120
MS 129	**Crack Initiation in Polycrystalline Aluminium Fatigued at Low Strain.** By A. E. King and D. G. Teer	121
MS 130	**The Relationship between Surface Deformation and Grain Orientation in Fatigued Polycrystalline Aluminium.** By R. D. Arnell and D. G. Teer	126
MS 131	**An Electron-Microscope Study of Precipitation in Cu–Be Alloys.** By P. Wilkes and M. M. Jackson	130
MS 132	**The Effect of Intermediate Annealing on the Fatigue Life of Iron.** By D. J. Lloyd and A. P. Greenough	134
MS 133	**A Theory for the Effects of Strain-Rate-Sensitivity on Ductile Fracture.** By P. F. Thomason	139
MS 134	**Fracture Behaviour of Nickel and Nickel–Iron Alloys under Hot-Working Conditions.** By M. J. Luton and W. J. McG. Tegart	142
MS 135	**The Cyclic Hardening of Copper Single Crystals.** By D. Shinozaki and J. D. Embury	147
MS 136	**Grain-Boundary Sliding and Cavity Growth during the High-Temperature Fatigue of Magnox Al80.** By H. E. Evans and R. P. Skelton	152
MS 137	**Fracture in Pearlitic Steels.** By J. T. Barnby and M. R. Johnson	155
———	**Discussion: On the Activation Energy for Creep of Nickel-Base High-Temperature Alloys**	159
MS 138	**Development and Refinement of the Recovery-Creep Theory.** By R. Lagneborg	161
MS 139	**Tensile-Deformation Characteristics of Unidirectionally Solidified Eutectic Alloys.** By A. R. T. de Silva and G. A. Chadwick	168
MS 140	**The Relationship between Structure and Stress-Corrosion Life in an Al–Zn–Mg Alloy.** By M. K. B. Day, A. J. Cornish, and T. P. Dent	175
MS 141	**Dislocation Structures in Aluminium Crystals Fatigued in Different Orientations.** By A. B. Mitchell and D. G. Teer	183
MS 142	**The Effect of Hydrogen on the Work-Hardening and Fracture Behaviour of Titanium–Low-Aluminium–Low-Manganese Alloys.** By R. Haynes and P. J. Maddocks	190
MS 143	**Grain-Boundary Sliding in Zinc Bicrystals Deformed at a Constant Strain Rate.** By M. D. Halliday, C. A. P. Horton, and C. J. Beevers	195
MS 144	**Effects of Alloying Elements on the Mechanical Properties of Steels at Low Temperatures.** By E. Anderson, R. Bode, J. E. Dorn, and J. Spreadborough	201
MS 145	**A Kinetic Approach to Hydrogen Diffusion through Steel at 100–350°C.** By F. R. Coe and J. Moreton	209
MS 146	**The Early Stages of Growth of Second-Phase Particles in an Fe–Ti–Si Alloy.** By D. M. Schwartz and B. Ralph	216
MS 147	**Cavity Growth by Grain-Boundary Sliding during Creep of Copper.** By P. W. Davies and K. R. Williams	220
MS 148	**A Relationship between Transient and Steady-State Creep at Elevated Temperatures.** By G. A. Webster, A. P. D. Cox, and J. E. Dorn	221
MS 149	**The Effect of Annealing on Cavities in High-Purity Copper.** By A. Gittins and H. D. Williams	226
MS 150	**Irradiation-Induced Precipitation in a Niobium-Stabilized Stainless Steel.** By J. P. Shepherd	229
MS 151	**Density Changes during Creep in Nickel.** By D. A. Woodford	234
